Step 3 - Process Parameters

To properly select the correct flowmeter for your application, you must enter the correct parameters for your application.

Maximum Rate: 100 lbs/min

Density: 8 g/cc

Viscosity: 5 cP

Pressure: 150 psi

Temperature: 50 deg F

Step 8 - Customer Configuration Data

Please enter your Tag information

Tag: ?

Please enter your required transmitter configuration data. You can leave the default values as displayed below, or edit them to fit your application needs. The transmitter will be pre-configured in our factory before it ships to you.

Milliamp Output

Flowrate at 4mA

Flowrate at 20mA

Frequency Output

The max flowrate of ?
corresponds to ?
